Water butts	15
compost bins	25
wormeries	10
energy ligh bulbs	5
recycling bins	25
gardening books	5
home recycling boxes	15

Below is a chart representation of the sales figures in relation to the products that KIC sell.

# Review Of Climate Change

Some helpful suggestions to stop climate change

## The two-degree solution

Don't overheat rooms in cold weather and overcool them when it's hot. Moving the thermostat down 2° in winter and up 2° in summer can save about 350 pounds of carbon dioxide emissions a year.

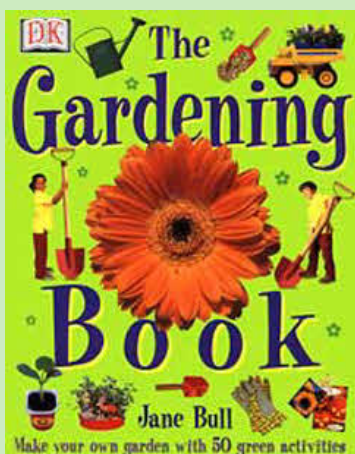

## Double-up for cold weather

Switching to double-pane windows will trap more heat inside your home, so you use less energy in the winter.

## Take a power-shower

Showers account for two-thirds of all household water-heating costs. Cut down your shower time and you'll cut down on energy.

## Buy local

Buying locally means less energy is required to drive your products to the market. Look for local fruits and vegetables, or even try growing your own. Try to buy clothes and other items that are manufactured close to home.

## Don't sit idly by

Idling wastes gas. Turn off your car when you're simply sitting in it.
